# EV CHARGING FOR YOUR BUSINESS

HEXAR SOLUTIONS PTY LTD

evnex CERTIFIED INSTALLER

Smart Evnex chargers at your employees' homes and at your workplace, all managed from one dashboard. Supplied and installed by Hexar Solutions, with one point of contact for every install.

## AT YOUR EMPLOYEES' HOMES

### KEEP THE FLEET ON THE ROAD

- Company EVs leave home fully charged every morning, with no detours to public chargers.
- Every charging session is tracked, so you reimburse the exact cost of company use.
- Employees use the Evnex driver app to schedule and check charging.
- Off-peak scheduling and solar diversion keep the cost per kilometre down.

## AT YOUR WORKPLACE OR DEPOT

### COMMERCIAL-GRADE CONTROL

- RFID tags let you control who can charge, and track use by employee and charger.
- Load management spreads power across several chargers without overloading your supply.
- On-site solar is used first, with the grid as top-up.
- Three-phase X22 charging for depots and vehicles that need to turn around fast.

## CONTROL THE COST FROM ONE DASHBOARD

### SIMPLE REIMBURSEMENT

Clear per-session records of home charging, ready for payroll or expenses.

### CONNECTED ANYWHERE

Wi-Fi and 4G options, so every charger reports in, whether it's at work or at a home.

### EMISSIONS REPORTING

Energy sources, emissions and CO2e offset across every charger, for your sustainability reporting.

### REMOTE UPDATES

Firmware updates over the air, plus local Evnex support for the software.

# BUILT FOR THESE BUSINESSES

### TRADES & SERVICE
Electric vans and utes charged at home overnight, ready for the first job.

### NOVATED LEASE
Add a home charger to your salary-packaging offer.

### CORPORATE FLEETS
Sales and manager vehicles, with charging costs you can track and reimburse.

### COUNCILS & GOVT
Emissions reporting and access control across depots and staff homes.

### PROPERTY MANAGERS
Shared car-park chargers with RFID access and load management.

# HOW WE RUN THE ROLLOUT

**01**
### ONE CONTACT
One Hexar contact for every install, whether it's one site or a dozen homes.

**02**
### BOOKING
We book directly with each employee, or through your office. You choose.

**03**
### INSTALL
Installs across Brisbane suburbs and sites, done to AS/NZS 3000 and certified.

**04**
### DASHBOARD
We help set up the fleet dashboard and reimbursement, with ongoing software support from Evnex.

# THE CHARGERS

### E2 FLEX
7.4 kW single phase. Home fleet charging, with solar as a later upgrade.

### E2 CORE
7.4 kW single phase. Scheduling and solar diversion built in.

### E2 PLUS
7.4 kW with an 8 m cable and 4G, for homes with weak Wi-Fi.

## 22 KW 3 PHASE
### X22
Up to 22 kW, with ethernet. For workplaces, depots and multi-charger sites.

**Annual inspection service.** Yearly safety and performance checks across your charger network, available for a fee.

**5 YEARS**
HEXAR WORKMANSHIP
